

Excerpt from Economic Aspect of Lengthening Human Life Concerted action by life insurance companies to lengthen human life would mark, I believe, one of the greatest steps, if not the greatest step, ever yet taken toward the improvement of human longevity. The nearest analogy is perhaps to be found in the work of fire insurance companies in reducing the number of fires. But it is a general truth that the best success of any movement is found only when, in a sense, it reaches the commercial stage - in other words, when it is made to pay in some tangible way. Philanthropy is keen to lead the way to reform, but becomes a broken reed if depended upon for its support continuously or on a large scale. The insurance men whom I have consulted as to whether it would pay to engage in the saving of lives have been unanimously affirmative in their answers. So obvious does this seem that the question arises, why have insurance companies never attempted it before? There seem to be three explanations: First, the continuance, until recently, of the tradition that human mortality follows a nearly invariable law, and a law which can not be appreciably affected by any act of man. Second, after it became known to experts that human life is greatly extensible through public and private hygiene, this knowledge was possessed by so few, that the general public, and even the rank and file of the medical profession, remained of the contrary belief, and the inertia of their conservative opinion prevailed. Third, it seemed too large a task for any one company to prolong life for the whole country, and there seemed no way to prolong the lives of its own policy-holders alone, so long as unsanitary conditions prevailed throughout the communities in which these policy-holders lived, while finally there seemed no way of bringing the various life insurance interests to agree on concerted action. It seems now, however, that the time has arrived when all three of these objections can be removed. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
